

SHIVAM GOYAL

Associate Product Manager | Fintech & Payments | AI-First Product Builder

+91 8433191219 | shivamgoyal452@gmail.com | [LinkedIn Profile](#) | [Portfolio](#) | Product Case Studies: [LinkedIn](#) →

PROFESSIONAL SUMMARY

Product-focused engineer with 3+ years of hands-on experience building, shipping, and improving global core banking products (GPP-SP) across Singapore, Switzerland, and EU markets. Certified in AI-First Product Management (Airtribe) with 8+ independently executed product case studies spanning growth strategy, UX evaluation, GTM design, competitive analysis, and funnel optimisation. Brings rare combination of deep technical fluency (ISO 20022, SWIFT, CBPR+) and product thinking — enabling fast requirement breakdown, precise stakeholder communication, and data-driven decision making. Experienced in Agile/Scrum, PRD writing, user journey mapping, A/B testing, RICE/MoSCoW prioritisation, and cross-functional execution. Ready to own product outcomes from day one.

PROFESSIONAL EXPERIENCE

Finastra · Software Engineer – Product & Quality (GPP-SP Platform)

Aug 2025 – Present

- ▶ **Platform Modernisation:** Led Java 1.8 → Java 21 migration for GPP-SP payment platform — defined requirements, assessed compatibility risks, coordinated with engineering teams, and delivered 20% reduction in technical debt with zero regression failures
- ▶ **Zero-to-One Internal Tool:** Identified QA team friction through user research → designed, built, and shipped an AI-assisted Markdown migration utility that eliminated 100% of manual test case migration effort, boosting team productivity by ~95%
- ▶ **CI/CD Product Ownership:** Owned end-to-end pipeline automation roadmap using Jenkins and Azure DevOps — defined success metrics, wrote requirements, and delivered YAML-based automation adopted across API and Web test layers
- ▶ **JAZ Observability Tool:** Conceptualised and shipped JAZ — an internal CI/CD health monitoring tool — from zero to one, using GitHub Copilot and Claude AI; solved real pain point for DevOps and infrastructure teams with real-time pipeline visibility

Finastra · Associate QA Engineer – GPP-SP Payments Platform

Aug 2023 – Aug 2025

- ▶ **User Research & Friction Mapping:** Analysed MT/MX, SEPA, and NZRTGS payment user journeys to identify friction points — findings directly reduced user-reported issues by ~25% across banking client deployments
- ▶ **End-to-End Product Validation:** Mapped and validated CBPR+ 2025 Hybrid payment flows (Structured, Unstructured, Hybrid) for global banking clients across Singapore, Switzerland, and EU — ensuring product met regulatory and business requirements
- ▶ **Release Velocity:** Automated regression validation flows reducing regression cycle time by 30–40% — enabling faster CR delivery and shorter release cycles across GPP-SP versions 4.6, 4.7, and 4.8
- ▶ **Cross-Version Compatibility:** Ensured cross-version product compatibility (4.6→4.8) within cross-functional Agile teams of 8–15 engineers, reducing integration inconsistencies and improving release confidence for Swedbank, UniCredit, and OCBC

PRODUCT CASE STUDIES

JAR App — Full 7-Day Product Breakdown → [View Case Study](#)

2025

- ▶ Conducted full product breakdown over 7 days: Day 1 product thinking, Day 2 target audience mapping, Day 3 feature analysis, Day 4 UX evaluation, Day 5 competitive analysis, Day 6 GTM strategy, Day 7 product strategy
- ▶ Identified key UX gaps and proposed 3 high-impact feature improvements with success metrics tied to activation, retention, and revenue growth

- ▶ Designed GTM framework and competitive positioning — benchmarked against Groww, Zerodha, and Fi Money — using RICE scoring to prioritise experiments

Meesho — Growth Strategy (AARRR + HEART Frameworks) → [View Case Study](#)

2025

- ▶ Synthesised customer research from Google, Reddit, X, and app reviews using HEART framework — identified top 5 friction areas across discovery, reliability, and post-purchase loops
- ▶ Mapped full AARRR funnel → proposed measurable solutions tied to north-star metrics; projected 10–15% improvement in activation and 8% lift in retention
- ▶ Delivered prioritised feature backlog using MoSCoW framework — aligned user experience improvements to revenue impact

Spotify — Premium Conversion Funnel Strategy → [View Case Study](#)

2025

- ▶ Audited full trial-to-premium conversion funnel — identified 'content sampling' and 'playlist lock-in' as top activation levers through user behaviour analysis
- ▶ Designed 3 activation experiments using RICE scoring; proposed content-loop mechanism with projected 8–12% trial-to-premium conversion lift
- ▶ Delivered PRD-style feature spec with success metrics, edge cases, and rollout plan — ready for sprint planning

Instagram Threads — Growth Loop Optimisation → [View Case Study](#)

2025

- ▶ Mapped viral, content, and notification growth loops → identified critical gaps in content density and multi-session stickiness causing early user churn
- ▶ Proposed 5 prioritised experiments with projected 8–12% engagement lift — each experiment tied to measurable north-star metrics and defined success criteria

Zomato — Tier-1 City Growth Strategy

2025

- ▶ Designed comprehensive growth strategy to improve order frequency in Tier-1 cities — analysed funnel drop-offs, reliability gaps, and competitor data across Swiggy and Blinkit
- ▶ Proposed 3 high-impact product levers — Delivery Reliability Score, Smart Reorder Nudges, and Habit-Building Offers — prioritised using RICE framework with projected 10–15% frequency improvement

NoBroker — Services Discovery & GTM Design

2025

- ▶ Conducted market analysis for Tier-1 housing societies — identified top service gaps through user interviews and competitive benchmarking
- ▶ Designed full GTM and pricing framework with value proposition, user journeys, and retention recommendations — delivered as structured PRD document

Snabbt — Startup Product Analysis → [View Case Study](#)

2025

- ▶ Analysed Snabbt's home services product — evaluated market positioning, user acquisition model, and growth loops
- ▶ Identified 2 key product gaps and proposed feature improvements with GTM recommendations for rapid market expansion

SKILLS

Product	PRD Writing · User Research · User Journey Mapping · Wireframing (Figma) · A/B Testing · Funnel Analysis · RICE · MoSCoW · North-Star Metrics · Sprint Planning · Backlog Management · GTM Strategy · Competitive Analysis
Analytics	SQL (cohort & funnel analysis) · Amplitude · Google Analytics · PowerBI · Data-Driven Decision Making · Metrics & KPIs
Agile & PM	Agile · Scrum · Sprint Delivery · Stakeholder Management · Cross-functional Collaboration · Requirement Breakdown · Roadmapping
Domain	Fintech · Core Banking · SWIFT MT/MX · ISO 20022 · CBPR+ · SEPA · NZRTGS · Payment Orchestration · GPP-SP (4.6–4.8)

Technical	Core Java · Git · Jenkins · Azure DevOps · CI/CD · Selenium · BDD · Jira · Confluence · Notion
AI & Tools	Claude AI · GitHub Copilot · Agentic AI · Prompt Engineering · Figma · Whimsical · VS Code
Soft Skills	Product Storytelling · Ownership · User Empathy · Critical Thinking · Communication · Problem Solving · Leadership

EDUCATION

Visvesvaraya Technological University (Sambhram Institute of Technology) · **B.E. – Electronics & Communication Engineering** *2017 – 2021*

IIIT Bangalore · **Advanced Certificate in Data Science** *2022 – 2023*

CERTIFICATIONS, AWARDS & PUBLICATIONS

- ▶ AI-First Product Management — Airtribe (2025) | Top performer — received highest marks in cohort
- ▶ 7-Day Product Breakdown Challenge — Airtribe (2025)
- ▶ DS ACP C44 — Business Analytics, IIIT Bangalore
- ▶ SQL Certification — HackerRank
- ▶ Embedded System Design — NPTEL | Texas Instruments Analogue Systems
- ▶ Recognised twice at Finastra for outstanding product effectiveness and process improvements
- ▶ Top 20 Finalist (Karnataka) — National IESE Makeathon (All India Competition)
- ▶ Published: Android Controlled Hovercraft for Space Mission — IJSREM
