

Shivam Goyal

Software Engineer | +91 7500225843 / +91 8433191219 | [E-Mail](#) | [LinkedIn](#) | [GitHub](#)

Product-focused engineer transitioning into Product Management with **3+ years of experience building and improving global core banking products GPP-SP (ISO 20022, SWIFT, CBPR+)** across Singapore, Switzerland, and EU markets. Brings strong expertise in **requirements analysis, workflow design, problem-solving, experimentation, system thinking, user research, and cross-functional execution**. Certified in **AI-First Product Management (Airtribe)** with additional experience in system design, recommender systems, customer insights, and growth strategy.

PROFESSIONAL EXPERIENCE

Finastra	Software Engineer	Aug 2025 – Present
	- Modernised legacy payment services by leading Java 1.8 → Java 21 migration, improving performance, scalability, and reducing technical debt by 20%. - Built an AI-assisted automation, Markdown-based, which helps to convert old test cases flow with new architecture, which boosts QA/Product team productivity by ~95% and eliminates manual migration effort.	
Finastra	Associate QA Engineer	Aug 2023 – Aug 2025
	- Analysed MT/MX, SEPA, NZRTGS user behaviour to identify friction, reducing user-reported issues by ~25%. - Mapped CBPR+ 2025 payment journeys and validated end-to-end flows for global banking clients. - Automated validation flows, cutting regression cycle time by 30–40% and accelerating CR delivery. - Ensured cross-version compatibility (4.6→4.8), reducing integration inconsistencies across releases.	

SKILLS

Product Skills: PRD Writing, Requirement Breakdown, User Research, User Journey Mapping, Metrics & KPIs, Wireframing, Figma, A/B Testing, Prioritisation (RICE, MoSCoW), Problem Solving, Sprint Planning, Stakeholder Management, Competitive Analysis

Domain Skills: Payments (SWIFT MT/MX, ISO 20022, CBPR+, SEPA, NZRTGS, HV/LV), GPP-SP (4.6–4.8), Core Banking Payment Flow, Transaction Flows, CR Management, Payment Orchestration

Technical Skills: Java, SQL, Git, Jenkins, Test Automation Frameworks, CI/CD, Azure DevOps, Selenium, BDD, TDD, Agentic AI

Soft Skills: Storytelling, Prioritisation, Ownership, User Empathy, Communication, Critical Thinking, Cross-functional Collaboration

PROJECTS

Meesho – Product Thinking (AARRR + HEART Frameworks)

- Synthesised customer research from Google, Reddit, X, and app reviews to identify the **top 5 friction areas** across discovery, reliability, and post-purchase loops.

- Proposed measurable solutions tied to AARRR funnels & HEART metrics, enabling **north-star alignment** between user experience and revenue impact.

Spotify – Premium Conversion Strategy

- Audited full conversion funnel → identified “content sampling” and “playlist lock-in” as activation levers.
- Designed activation experiments using RICE scoring; proposed content-loop mechanism increasing potential trial-to-premium lift by **8–12%**.

Instagram Threads – Growth Loop Optimisation

- Mapped Threads’ viral, content, and notification loops → identified gaps in content density & multi-session stickiness.
- Proposed 5 experiments with success metrics projected to increase engagement by **8–12%**.

NoBroker – Services Discovery & GTM

- Conducted market analysis for Tier-1 societies, identified top service gaps and designed GTM & pricing frameworks.
- Delivered value prop, user journeys, and retention recommendations.

Zomato Growth Strategy – Tier-1 City Growth Strategy

- Designed a comprehensive growth strategy to improve order frequency in Tier-1 cities by analysing funnel drop-offs, reliability gaps, and competitor insights. Proposed 3 high-impact product levers.
- Delivery Reliability Score, Smart Reorder Nudges, and Habit-Building Offers, prioritised using RICE to maximise retention.

EDUCATION

International Institute of Information Technology, Bangalore

Advance Certificate of Data Science (2022–2023)

Bachelor of Engineering

Sambhram Institute of Technology
Electronics & Communication Engineering (2017–2021)

CERTIFICATIONS

AI-First Product Management — Airtribe (2025)

7-Day Product Breakdown Challenge

DS ACP C44 — Business Analytics (IIIT-B)

SQL (HackerRank)

Embedded System Design — NPTEL

Texas Instruments Analogue Systems

AWARDS & ACHIEVEMENTS

- Recognised twice at **Finastra** for outstanding product-effectiveness & process improvements
- Top 20 finalist (Karnataka) – **National IESE Makeathon**
- Published: *Android Controlled Hovercraft for Space Mission (IJSREM)*
