

SHIVAM GOYAL

Business and Solution Analyst | GPP Payment Engine Expert | ISO 20022 and SWIFT | Cash Management | Core Banking

+91 8433191219 | shivamgoyal452@gmail.com | linkedin.com/in/shivamgoyal452

PROFESSIONAL SUMMARY

Business and Solution Analyst with 3+ years of hands-on expertise in Global Pay Plus (GPP) payment engine (v4.6-4.8), ISO 20022 payment file formats, and SWIFT messaging standards within regulated core banking environments. Experienced in leading end-to-end feature lifecycle delivery - from requirement analysis, gap analysis, functional specification authoring, and Business Requirements Document (BRD) creation through feature file development, GPP configuration, solution design, SIT and UAT support, traceability matrix management, and production handover. Deep domain knowledge across Cash Management, Clearing and Settlement, Payments Hub, SEPA, NZRTGS, CBPR+, SWIFT gpi, and High/Mass Value payment systems. Proven ability to lead Three Amigos sessions, baseline requirements with stakeholders, map As-Is and To-Be processes, author change management documentation, and collaborate with cross-functional Agile/Scrum teams of 8-15 engineers to deliver complex payment features on schedule.

KEY ACHIEVEMENTS

- Led end-to-end feature delivery for CBPR+ 2025 Hybrid on GPP - owned gap analysis, functional specification, BRD authoring, GPP configuration, feature file creation, traceability matrix, SIT validation, and UAT handover across Structured, Unstructured, and Hybrid payment formats
- Held sole Business and Solution Analyst ownership for Swedbank on GPP-SP - full lifecycle from As-Is/To-Be process mapping and requirement baseline through acceptance criteria sign-off, sprint reviews, and production support across v4.6, 4.7, and 4.8
- Authored functional specifications and feature files for ISO 20022 payment field/value mapping across pacs, pain, and camt message types - ensuring compliance for Pain.013 Drawdown, Caller Pay, MT/MX, HV/LV, and SWIFT gpi payment flows
- Delivered clearing and settlement validation across SEPA, NZRTGS, GFIT, and TARGET2 - including gateway testing, payment routing analysis, change management documentation, and network-specific compliance verification
- Built AI-powered internal tooling reducing manual documentation and migration effort by 95% - improving team productivity across feature delivery and change management cycles
- Recognised multiple times at Finastra for outstanding product effectiveness and process improvement contributions

PROFESSIONAL EXPERIENCE

Finastra | Business and Solution Analyst - GPP Payment Platform (CCS)

Aug 2025 - Present

- **Solution Design and GPP Configuration:** Led solution design, gap analysis, and rule implementation in Global Pay Plus (GPP) payment engine for Cash Management digital platform features - authored functional specifications and Business Requirements Documents (BRD), mapped As-Is and To-Be processes, and aligned configuration with ISO 20022 and SWIFT gpi payment standards
- **Feature Ownership and WBS Estimation:** Acted as feature owner for platform modernisation initiatives - led requirement analysis, gap analysis, and detailed Work Breakdown Structure (WBS) estimation, established requirement baselines with stakeholder sign-off, chaired Three Amigos sessions with Dev and QA leads, and tracked delivery in Jira within Agile sprint cycles
- **Functional Specification and Feature Files:** Authored comprehensive functional specifications, BRDs, Gherkin-based feature files, traceability matrices, and acceptance criteria - led sprint review demos and ensured thorough requirement grooming with development and QA teams for complex payment feature delivery

- **SIT, UAT, and Production Handover:** Governed System Integration Testing (SIT) and UAT cycles for Cash Management platform features - validated end-to-end payment flows, managed defect triage, produced test evidence documentation, and led feature handover to production with full change management sign-off
- **Stakeholder Engagement and Change Management:** Engaged banking stakeholders for requirement clarification, change management approval, and production issue resolution - delivered root cause analyses for critical incidents and maintained traceability matrix for all change requests, reducing resolution time and improving delivery transparency

Finastra | Business and Solution Analyst - GPP-SP Payments (Associate)

Aug 2023 - Aug 2025

- **Swedbank - Full BSA Ownership:** Held sole end-to-end Business and Solution Analyst ownership for Swedbank on GPP-SP - led As-Is/To-Be process mapping, gap analysis, functional specification authoring, requirement baseline establishment, Gherkin feature file creation, GPP configuration support, SIT validation, UAT handover, and production support across v4.6, 4.7, and 4.8
- **Cash Management and Payments Hub:** Led business analysis and solution design for Cash Management, Payments Hub, Clearing and Settlement, and Automated Clearing House (ACH) features - including SEPA, NZRTGS, GFIT, TARGET2, and CBPR+ 2025 Hybrid (Structured, Unstructured, Hybrid) payment flows with full gateway and SIT validation
- **ISO 20022 and SWIFT Payment File Formats:** Authored functional specifications and payment field/value mapping documentation for ISO 20022 message types - pacs (payment clearing and settlement), pain (payment initiation including Pain.013 Drawdown and Caller Pay), and camt (cash management) - including SWIFT gpi field validation and MT to MX migration mapping
- **CBPR+ 2025 Feature Delivery and Change Management:** Led requirement baseline, gap analysis, and solution design for CBPR+ 2025 Hybrid release on GPP - authored BRDs and feature files, chaired Three Amigos sessions, managed change management documentation, governed SIT and UAT cycles, and delivered feature handover with full traceability matrix and stakeholder sign-off
- **Cross-functional Agile Delivery and Sprint Reviews:** Collaborated within Agile/Scrum teams of 8-15 engineers for UniCredit and OCBC - led sprint grooming, chaired sprint review demos, managed Jira-tracked defect lifecycle, supported GPP configuration, and ensured regulatory compliance across all supported payment types and clearing networks
- **MT and MX Payment Validation:** Delivered requirement analysis, functional specifications, and SIT validation for SWIFT MT Messages, MX Messages, High Value (HV), and Mass Value/Low Value (LV) payment flows - including payment field/value mapping, business rule verification, and compliance with SWIFT gpi and ISO 20022 standards

uTest | QA and Business Analyst - Multi-platform

Apr 2022 - Mar 2025

- Performed structured business validation and exploratory testing across web, mobile, and desktop platforms - documenting defect reports with clear reproduction steps, test evidence, and business impact analysis for cross-functional development teams
- Delivered gap analysis and defect triage documentation consistently meeting client SLAs across concurrent delivery cycles - building strong requirement documentation and stakeholder communication skills

SiliconIndia US | Technical Process Executive

Sep 2021 - Feb 2022

- Handled client coordination, business analysis, onboarding workflow documentation, and technical research - building core stakeholder management, change management communication, and analytical skills in a fast-paced environment

TECHNICAL AND DOMAIN SKILLS

Core BA/SA Skills: Business Analysis, Solution Design, Gap Analysis, As-Is/To-Be Process Mapping, Functional Specification, Business Requirements Document (BRD), Requirement Baseline, Traceability Matrix, Change Management, Sign-off Management

Feature Delivery: Feature Owner, Feature Files (Gherkin/BDD), Acceptance Criteria, Work Breakdown Structure (WBS), Three Amigos Sessions, Sprint Review and Demo, Backlog Grooming, Stakeholder Engagement

Testing: System Integration Testing (SIT), UAT Support, Feature Handover, Regression Testing, Defect Lifecycle Management, Test Evidence Documentation, Production Support

GPP Platform: Global Pay Plus (GPP) v4.6, v4.7, v4.8, GPP-SP, GPP Configuration, Rule Implementation, CR Management, Payment Orchestration

Payment Types: SWIFT MT Messages, SWIFT MX Messages, SWIFT gpi, High Value (HV), Mass Value/Low Value (LV), Pain.013 Drawdown, Caller Pay, SEPA Credit Transfer, CBPR+, CBPR+ 2025 Hybrid (Structured/Unstructured/Hybrid)

ISO 20022: pacs (payment clearing and settlement), pain (payment initiation), camt (cash management), Payment File Formats, Payment Field/Value Mapping, MT to MX Migration, Financial Messaging

Clearing Networks: SEPA, NZRTGS, GFIT, TARGET2, CBPR+, Cash Management, Payments Hub, Automated Clearing House (ACH), Gateway Testing

Methodology: Agile, Scrum, Sprint Planning, Backlog Grooming, Cross-functional Collaboration, Defect Management, Risk and Compliance Testing, Jira, Confluence

Technical Tools: Core Java, SQL, Jenkins, Azure DevOps, Git, GitHub, Maven, SonarQube, Selenium, BDD, Cucumber, IntelliJ IDEA, VS Code

AI and Productivity: Claude AI, GitHub Copilot, Agentic AI, Prompt Engineering, GenAI

Soft Skills: Stakeholder Communication, End-to-End Ownership, Attention to Detail, Critical Thinking, Problem Solving, Team Player, Cultural Diversity Awareness

EDUCATION

Visvesvaraya Technological University (Sambhram Institute of Technology) | B.E. - Electronics and Communication Engineering
2017 - 2021

International Institute of Information Technology Bangalore (IIIT-B) | Advanced Certificate in Data Science
2022 - 2023

CERTIFICATIONS, AWARDS AND PUBLICATIONS

- AI-First Product Management - Airtribe (2025)
- 7-Day Product Breakdown Challenge - Airtribe (2025)
- DS ACP C44 - Business Analytics, IIIT Bangalore
- SQL Certification - HackerRank
- Embedded System Design - NPTEL | Texas Instruments Analogue Systems
- Recognised multiple times at Finastra for outstanding product effectiveness and process improvements
- Top 20 Finalist (Karnataka) - National IESE Makeathon (All India Competition)
- Published: Android Controlled Hovercraft for Space Mission - IJSREM
