

SHIVAM GOYAL

SDET | QA Automation Engineer | Fintech & Global Payments | Java | Selenium | ISO 20022 | SWIFT
+91 8433191219 | shivamgoyal452@gmail.com | linkedin.com/in/shivamgoyal452

PROFESSIONAL SUMMARY

Results-driven SDET and QA Automation Engineer with 3+ years of experience designing, building, and owning scalable test automation frameworks for global financial payment systems. Deep expertise in Java, Selenium, BDD, and data-driven testing across SWIFT MT/MX messaging, ISO 20022 (pacs, pain, camt), SEPA, CBPR+, and High/Mass Value payments. Proven track record of reducing manual testing effort by up to 95%, automating 500+ test cases, and owning test planning, test strategy, and defect lifecycle management in regulated banking environments. Experienced in Agile/Scrum delivery, CI/CD pipeline engineering, REST API testing, microservices validation, SQL validation, and AI-powered internal tooling. Thrive under pressure with full end-to-end ownership of quality.

KEY ACHIEVEMENTS

- Automated 500+ test cases across SWIFT MT/MX, SEPA, CBPR+, NZRTGS, HV/LV and ISO 20022 payment flows - reducing manual testing effort by 80-95% through data-driven testing and reusable framework design
- Owned full test planning, test strategy, and defect lifecycle management for Swedbank - covering framework design, test coverage analysis, Jira-tracked defect resolution, and regression across GPP-SP v4.6-4.8
- Built JAZ - an AI-powered internal CI/CD observability tool providing real-time Jenkins and Azure DevOps pipeline health monitoring, adopted by DevOps and infrastructure teams
- Led JDK 1.8 to JDK 21 enterprise migration for payment automation suite - achieving zero regression failures, improved performance, and full test coverage validation post-migration
- Designed AI-powered Markdown migration utility eliminating 100% of manual test case conversion effort - boosting QA team productivity by 95% through intelligent automation
- Recognised multiple times at Finastra for outstanding product effectiveness and process improvement contributions

PROFESSIONAL EXPERIENCE

Finastra | Software Engineer - SDET (Automation and Payment QA)

Aug 2025 - Present

- JDK Migration and Test Coverage:** Led end-to-end migration of enterprise automation suite from Java JDK 1.8 to JDK 21 - defined test planning strategy, validated full test coverage across SWIFT MT/MX and ISO 20022 payment test suites, achieving zero regression failures and measurable performance improvement
- AI Migration Utility and Productivity:** Designed and built AI-powered Markdown migration utility enabling QA teams to convert 500+ legacy test cases to new architecture without manual effort - reducing migration time by 95% through data-driven test conversion and automated validation
- CI/CD Pipeline Engineering:** Engineered and maintained scalable CI/CD pipelines using YAML for automated end-to-end test execution across REST API and microservices layers - integrated within Agile sprint cycles using Jenkins and Azure DevOps with Jira-tracked defect lifecycle management
- JAZ Observability Tool:** Designed, built, and shipped JAZ CI Automation Tool - a desktop solution for real-time CI/CD pipeline health monitoring across Jenkins and Azure DevOps using GitHub Copilot and Claude AI - improving defect detection speed and incident response time for DevOps teams
- Root Cause Analysis and Stakeholder Support:** Performed SQL validation and root cause analysis on critical production issues raised by banking stakeholders - reducing incident resolution time and improving cross-functional transparency across Agile delivery teams

Finastra | Associate QA Engineer

Aug 2023 - Aug 2025

- **Swedbank - Full Test Planning and Ownership:** Held sole end-to-end SDET ownership for Swedbank - leading test planning, test strategy, test case authoring, defect lifecycle management in Jira, and large-scale regression testing across GPP-SP v4.6, 4.7, and 4.8 with full test coverage validation
- **Payment Types - MT and MX Testing:** Designed and executed data-driven automated test suites for SWIFT MT Messages, MX Messages, High Value (HV), and Mass Value/Low Value (LV) payment flows - achieving 95% test coverage across multiple banking clients and clearing networks
- **Pain.013 and Caller Pay:** Built automated test coverage for Pain.013 Drawdown Request flows - both customer-initiated and bank-initiated including Caller Pay scenarios - with SQL validation of payment field mapping, business rule compliance, and end-to-end flow integrity
- **ISO 20022 Message Validation:** Executed structured message-level validation and SQL data validation across pacs (payment clearing and settlement), pain (payment initiation), and camt (cash management) message types - ensuring schema compliance, field mapping accuracy, and test coverage across all message variants
- **CBPR+ 2025 Hybrid and Clearing Networks:** Delivered end-to-end test automation and performance testing for CBPR+ 2025 Hybrid release covering Structured, Unstructured, and Hybrid payment formats - including REST API testing, gateway validation, and clearing system testing for SEPA, NZRTGS, GFIT, and TARGET2
- **Cross-functional Agile Delivery:** Collaborated within Agile/Scrum teams of 8-15 engineers for UniCredit and OCBC - driving sprint grooming, Jira defect tracking, test planning, and microservices testing across multiple product versions with full defect lifecycle ownership

uTest | Software QA Tester

Apr 2022 - Mar 2025

- Executed structured, exploratory, and cross-browser testing across web, mobile, and desktop platforms for global client products - maintaining strong defect acceptance rates and meeting client SLAs across concurrent test cycles
- Tracked and documented defect lifecycle end-to-end using client defect management platforms - delivering clear, reproducible bug reports with test evidence for cross-functional development teams

SiliconIndia US | Technical Process Executive

Sep 2021 - Feb 2022

- Handled client coordination, business analysis, onboarding workflows, and technical research - building core stakeholder management, communication, and problem-solving capabilities

TECHNICAL SKILLS

Languages: Core Java, SQL

Automation: Selenium, BDD, Cucumber, TDD, TestNG, JUnit, Data-driven Testing, Keyword-driven Testing, Page Object Model, FFF Automation Framework

API and Microservices: REST API Testing, SOAP Services, Microservices Testing, API Validation, Postman

Test Management: Test Planning, Test Strategy, Test Coverage Analysis, Defect Lifecycle Management, Regression Testing, Performance Testing, Cross-browser Testing

CI/CD and DevOps: Jenkins, Azure DevOps, Maven, YAML Pipelines, Git, GitHub, GitHub Copilot, SonarQube, JaCoCo

Payment Types: SWIFT MT Messages, SWIFT MX Messages, High Value (HV), Mass Value / Low Value (LV), Pain.013 Drawdown, Caller Pay, SEPA Credit Transfer, CBPR+, CBPR+ 2025 Hybrid (Structured / Unstructured / Hybrid)

ISO 20022: pacs (payment clearing and settlement), pain (payment initiation), camt (cash management), MT to MX Migration, Financial Messaging, Payment Field/Value Mapping

Clearing Networks: SEPA, NZRTGS, GFIT, TARGET2, CBPR+, GPP-SP (v4.6, 4.7, 4.8)

Domain: Payment Orchestration, Core Banking, Transaction Flow Validation, CR Management, Risk and Compliance Testing, Defect Management, Test Strategy, Shift-Left Testing, SQL Validation

Methodology: Agile, Scrum, Sprint Delivery, Cross-functional Collaboration, Stakeholder Management, Jira

AI and Tools: Claude AI, GitHub Copilot, Agentic AI, Prompt Engineering, GenAI, IntelliJ IDEA, VS Code

Soft Skills: End-to-End Ownership, Leadership, Problem Solving Under Pressure, Critical Thinking, Communication

EDUCATION

CERTIFICATIONS, AWARDS AND PUBLICATIONS

- AI-First Product Management - Airtribe (2025)
- DS ACP C44 - Business Analytics, IIIT Bangalore
- SQL Certification - HackerRank
- Embedded System Design - NPTEL | Texas Instruments Analogue Systems
- 7-Day Product Breakdown Challenge - Airtribe
- Recognised multiple times at Finastra for outstanding product effectiveness and process improvements
- Top 20 Finalist (Karnataka) - National IESE Makeathon (All India Competition)
