

SHIVAM GOYAL

Associate Product Manager | Fintech and Payments | AI-First Product Builder | Open to APM Roles
+91 8433191219 | shivamgoyal452@gmail.com | linkedin.com/in/shivamgoyal452 | Product Case Studies: LinkedIn

PROFESSIONAL SUMMARY

Product-focused engineer with 3+ years of experience shipping features on a live global core banking platform (GPP-SP) used by banks across Singapore, Switzerland, and the EU. Certified in AI-First Product Management (Airtribe, 2025) with 8+ independently executed product case studies spanning user research, growth strategy, UX evaluation, competitive analysis, GTM design, and A/B testing framework design. Brings a rare combination of deep technical fluency (ISO 20022, SWIFT, CBPR+, REST APIs, Agile/Scrum) and structured product thinking - enabling fast requirement breakdown, data-driven prioritisation using RICE and MoSCoW frameworks, and precise cross-functional stakeholder communication. Built two zero-to-one internal products at Finastra. Ready to own product outcomes from day one.

KEY ACHIEVEMENTS

- Shipped two zero-to-one internal products at Finastra - JAZ (CI/CD observability tool) and AI Markdown migration utility - reducing team effort by 95% and improving DevOps pipeline visibility across engineering teams
- Completed 8+ product case studies with top marks in AI-First PM cohort (Airtribe, 2025) - covering JAR 7-day breakdown, Meesho, Spotify, Instagram Threads, Zomato, NoBroker, and Snabbt
- Led end-to-end product validation for CBPR+ 2025 Hybrid payment features across Swedbank - covering requirement analysis, user story mapping, acceptance criteria, UAT support, and production handover
- Delivered product feature improvements for GPP-SP platform used by 3 enterprise banking clients (Swedbank, UniCredit, OCBC) across Singapore, Switzerland, and EU markets
- Recognised multiple times at Finastra for outstanding product effectiveness and process improvement contributions

PROFESSIONAL EXPERIENCE

Finastra | Software Engineer - Product and Quality (GPP-SP Platform)

Aug 2025 - Present

- **Zero-to-One Product: JAZ Observability Tool:** Identified DevOps team pain point through user research - designed, built, and shipped JAZ from zero to one using GitHub Copilot and Claude AI - a real-time CI/CD pipeline health monitoring tool adopted by infrastructure teams, reducing incident detection time by 40%
- **Zero-to-One Product: AI Migration Utility:** Conducted user interviews with QA team to map friction in legacy test migration - designed and shipped AI-powered Markdown utility eliminating 100% of manual migration effort, boosting team productivity by 95% - owned full product lifecycle from discovery to delivery
- **Platform Roadmap and Requirement Ownership:** Owned end-to-end product requirements for JDK 1.8 to JDK 21 platform migration - defined acceptance criteria, coordinated with engineering teams of 8-15 engineers, tracked delivery in Jira, and validated success metrics post-launch with zero regression failures
- **CI/CD Product Delivery:** Defined requirements, wrote user stories, and delivered YAML-based CI/CD automation pipeline across REST API and Web test layers - integrated within Agile sprint cycles using RICE prioritisation for feature sequencing

Finastra | Associate Product and QA Engineer - GPP-SP Payments

Aug 2023 - Aug 2025

- **User Research and Friction Mapping:** Analysed SWIFT MT/MX, SEPA, and NZRTGS payment user journeys using HEART framework - identified top 5 friction points across banking client deployments, informing feature improvements that reduced user-reported issues by 25%
- **Swedbank - Full Product Feature Ownership:** Held end-to-end product ownership for Swedbank on GPP-SP - led requirement analysis, user story authoring, acceptance criteria definition, sprint grooming, UAT support, and feature handover to production across v4.6, 4.7, and 4.8

- **CBPR+ 2025 Hybrid Feature Delivery:** Led product validation for CBPR+ 2025 Hybrid release - mapped user journeys for Structured, Unstructured, and Hybrid payment formats, defined acceptance criteria, and delivered end-to-end validation with full gateway testing across Singapore, Switzerland, and EU banking clients
- **Cross-functional Agile Product Delivery:** Drove sprint planning, backlog grooming, and stakeholder alignment within Agile/Scrum teams of 8-15 engineers for UniCredit and OCBC - translating business requirements into user stories, tracking defects in Jira, and ensuring on-time feature delivery

uTest | QA Analyst

Apr 2022 - Mar 2025

- Performed structured product validation and exploratory testing for global client products across web, mobile, and desktop platforms - identifying high-value UX issues and functional defects that improved product quality

SiliconIndia US | Technical Process Executive

Sep 2021 - Feb 2022

- Developed stakeholder communication, business analysis, and client onboarding skills across technical process workflows - building foundation for cross-functional product collaboration

PRODUCT CASE STUDIES

JAR App - Full 7-Day Product Breakdown [View Case Study](#)

2025

- Executed full product breakdown over 7 days - user research, target audience mapping, feature analysis, UX evaluation, competitive analysis (vs Groww, Zerodha, Fi Money), GTM strategy, and product roadmap - using RICE scoring to prioritise 3 high-impact experiments
- Identified 3 critical UX gaps and proposed feature improvements with measurable success metrics tied to activation, retention, and revenue - delivered as complete product strategy document

Meesho - Growth Strategy using AARRR and HEART Frameworks [View Case Study](#)

2025

- Synthesised user research from app reviews, Reddit, and Google using HEART framework - identified top 5 friction areas, mapped full AARRR funnel, and proposed solutions projecting 10-15% activation improvement and 8% retention lift
- Delivered prioritised feature backlog using MoSCoW framework - aligned UX improvements to north-star revenue metrics with defined A/B testing plan for each experiment

Spotify - Premium Conversion Funnel Strategy [View Case Study](#)

2025

- Audited trial-to-premium conversion funnel - identified content sampling and playlist lock-in as top activation levers through user behaviour analysis and competitive benchmarking
- Designed 3 A/B testing experiments using RICE scoring projecting 8-12% trial-to-premium conversion lift - delivered PRD-style feature spec with success metrics, edge cases, and rollout plan

Instagram Threads - Growth Loop Optimisation [View Case Study](#)

2025

- Mapped viral, content, and notification growth loops - identified critical gaps in content density and multi-session stickiness, proposed 5 prioritised experiments with projected 8-12% engagement lift

Zomato - Tier-1 City Growth Strategy

2025

- Designed growth strategy to improve order frequency in Tier-1 cities using RICE prioritisation - proposed Delivery Reliability Score, Smart Reorder Nudges, and Habit-Building Offers with projected 10-15% frequency improvement

SKILLS

Product Management: PRD Writing, User Research, User Story Mapping, Wireframing (Figma), A/B Testing, Funnel Analysis, North-Star Metrics, Product Roadmapping, Backlog Management, Feature Prioritisation

Frameworks: RICE, MoSCoW, AARRR, HEART, Jobs-to-be-Done, OKRs, GTM Strategy, Competitive Analysis, Growth Loops

Analytics and Data: SQL, Amplitude, Google Analytics, Cohort Analysis, Funnel Analysis, Data-driven Decision Making, KPIs and Metrics

Agile and Delivery: Agile, Scrum, Sprint Planning, Backlog Grooming, Stakeholder Management, Cross-functional Collaboration, Jira, Confluence

Domain: Fintech, Core Banking, SWIFT MT/MX, ISO 20022, CBPR+, SEPA, NZRTGS, Payment Orchestration, GPP-SP (4.6-4.8)

Technical: Core Java, REST APIs, Git, Jenkins, Azure DevOps, CI/CD, Selenium, BDD

AI and Tools: Claude AI, GitHub Copilot, Agentic AI, Prompt Engineering, Figma, Whimsical, Notion, VS Code

Soft Skills: Product Storytelling, User Empathy, Ownership, Critical Thinking, Leadership, Communication, Problem Solving

EDUCATION

Visvesvaraya Technological University (Sambhram Institute of Technology) | B.E. - Electronics and Communication Engineering
2017 - 2021

International Institute of Information Technology Bangalore (IIIT-B) | Advanced Certificate in Data Science
2022 - 2023

CERTIFICATIONS, AWARDS AND PUBLICATIONS

- AI-First Product Management - Airtribe (2025) | Top performer - highest marks in cohort
- 7-Day Product Breakdown Challenge - Airtribe (2025)
- DS ACP C44 - Business Analytics, IIIT Bangalore
- SQL Certification - HackerRank
- Embedded System Design - NPTEL | Texas Instruments Analogue Systems
- Recognised multiple times at Finastra for outstanding product effectiveness and process improvements
- Top 20 Finalist (Karnataka) - National IESE Makeathon (All India Competition)
- Published: Android Controlled Hovercraft for Space Mission - IJSREM
